		Expected outcome	The expected outcome of a Master of Social Work (MSW) program through Open and Distance Learning (ODL) is to produce competent and ethical professional social workers who can effectively promote social development and address human needs across diverse settings, utilizing the flexibility of distance education to reach a broader range of learners. This format ensures that graduates, whether studying part-time or remotely, gain the essential knowledge in social work theory, practical intervention skills, and critical understanding of social policies necessary for impactful careers in fields such as community development, healthcare, counseling, and non-profit management. Ultimately, the program empowers individuals to advocate for social justice, manage complex cases, and assume leadership roles in social welfare initiatives, all while accommodating their specific life circumstances.

Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Online

Brief describe the provision in LMS to be used by HEI :-

A dedicated team of trained counselors is assigned to provide online support to students. Comprehensive information will be available to students via phone, email, and the chat facility on our website. Additionally, we will conduct online webinars for prospective students, offering detailed information about the programs to facilitate enrollment.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :-

Assessment mechanism

The assessment scheme for continuous evaluation and term-end exams is managed through the LMS system, based on learning outcomes for each course or subject. The rubrics board in the LMS provides clear evaluation criteria for students. Formative Assessments (Continuous Evaluation): 25% Weightage Three Assignments: Objective Type: 10% Weightage 250-question bank, 50 randomized questions, 1-hour duration, 40% passing criterion. Immediate score display post-submission. Subjective Type: 10% Weightage Faculty-set questions, plagiarism checks, evaluator scoring. Discussion Forum: 5% Weightage Participation in LMS-published topics, faculty validation, and scoring based on response quality, Passing Requirement: 40% average per subject (10 out of 25 Marks). Learner Authentication: Aadhaar verification and OTP for assignment submission. Summative – Term End Examinations: 75% Weightage Exam Slot Booking: 10-day schedule, 5 slots per day, 90-minute duration per exam. Flexible date, subject, time, and city selection. Auto-generated email confirmation. Exam Format: 54 objective questions and 3 subjective questions (75 Marks total). Objective question bank of 250 questions per subject for randomization. Subjective questions set by faculty. Online Remote Proctored Examinations: Real-time proctor authentication, monitoring up to 50 students. Unique passwords and security features like AI facial recognition and live monitoring. Dashboard with reports and images for each exam. Objective questions evaluated automatically, subjective answers by evaluators. Scores entered into the system, downloadable by the controller of examinations.

Identified technological interface and interoperability	The LMS offers versatile integration and interoperability with various technological tools such as plagiarism detection and question banks. It integrates seamlessly with the Aadhaar verification tool, used in real time for logging in, assessments, and assignments. The user-friendly interfaces ensure intuitive navigation, and the LMS meets usability requirements for interoperability when sharing data. It can share content, questions, evaluations, and results through APIs with different platforms in real time if needed. The LMS is compatible with all popular and latest versions of web browsers, including Chrome (recommended), Firefox, and Internet Explorer.
Learner's Authentication Requirements	During the registration process, students must validate their identity through an online Aadhaar authentication process, where they receive an OTP to enter during registration. Students also need to submit complete documentation, including 10th and 12th standard mark sheets, degree certificates, government-issued photo ID, and name change documents (if applicable). For continuous evaluation, students are required to validate their identity through the Aadhaar authentication process in the LMS before submitting assignments. During examinations, various security features are implemented, such as AI facial recognition, navigation control, image capturing, and live online monitoring. These measures ensure the credibility and transparency of the examination process for both students and the university. IP-based tracking helps identify the student or user who has logged in, along with related details.
Learner Registration - through a web application	"Learner Registration: Aadhaar Card Verification: The student verifies their identity through the Aadhaar Card validation process, using an OTP for confirmation. Account Creation: Upon Aadhaar verification, the student proceeds to register through their newly created My Account. Information Entry: The student fills out all relevant fields in the web application form. Document Upload: The student uploads necessary documents, including Aadhaar card or government ID photo proof and a passport-sized photo. Fee Payment: After uploading documents, the student proceeds to make the online payment. Application Form: The student downloads the pre-filled application form, signs it, and sends it to the university for processing. Provisional Registration: Initially, students are registered provisionally while the university team verifies the submitted documents. LMS Credentials: Within 7 days of document verification, the student receives their LMS login ID and password via their registered email and is officially enrolled."
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	Active Learner Engagement: - Engagement Methods: Learners actively participate in discussion forums, complete assignments, and attend live interactive online sessions via the LMS. Analytics and Reports: Faculty use analytics, including reports and dashboards, to track student engagement. Attendance is recorded for every activity, with log reports available for download from the LMS. - Course Access and Academic Calendar: Instructions for accessing courses and the academic calendar are provided in the LMS for easy reference. The schedule for live sessions and discussion forums is published in advance to ensure student participation. - Alerts and Notifications: Regular alerts and notifications (via SMS, email, and calls) are sent for live sessions, discussion forums, practice exercises, assignment submissions, and term-end assessments. - Mentor and Faculty Support: Students can connect with mentors for any queries and with faculty for academic questions.
Payment Gateway –using Digital Payment system	Instructions for accessing courses and the academic calendar are provided in the LMS for easy understanding. The schedule for live sessions and discussion forums is published well in advance to facilitate student attendance. Regular alerts and notifications (via SMS, email, and calls) are sent for live online interactive sessions, discussion forums, practice exercises, assignment submissions, and term-end assessments. Students can connect with mentors for any queries and with faculty for academic questions. We have integrated an online payment gateway on the university website, allowing students to make payments via debit card, credit card, and NEFT. We use the Atom Payment Gateway for online transactions.
Tracking the delivery of a Course or programme	In addition to the comprehensive asynchronous courseware available through the LMS, our online programs adhere to UGC norms for course delivery. Synchronous online sessions and discussion forums are integrated into our delivery calendar within the LMS. Students can access the calendar for both components, enabling their participation. Faculty members are trained to deliver courses effectively in each component: live synchronous online sessions and discussion forums. The LMS generates reports with detailed information on the number of conducted and pending sessions. It also includes session-specific reports detailing dates, times, learner attendance, and log reports.
Technical Know-how or Skills Requirements	Our technical team is responsible for developing e-content/modules, delivering online programs, and managing admissions and examinations. They conducted in-house training and provided hands-on practice to staff members involved in delivering online programs. The LMS system accommodates various users, including System Admins, Program Coordinators, Course Coordinators, Course Mentors, Examiners, and Students. Skills and Processes: a. Production of E-Content/Digitization: - Skills required for converting base content to various formats using tools like Adobe Illustrator, Articulate Rise, and Adobe Flash. - Editing raw videos and audio, adding multimedia components using tools like After Effects and Camtasia. b. Creation of Online Courses: - Basic understanding required for creating online courses in the LMS system. Technical guidance provided to staff members for creating online courses using various e-learning formats. c. Admission Process: - Basic internet skills required for learner authentication and document submission during the online registration process. - University staff trained to verify admission documents and provide login credentials after eligibility confirmation. d. Delivery of Online Programs: - Synchronous live online sessions and discussion forums are facilitated through the LMS. - Faculty/course coordinators prepare lesson plans and topic lists for live sessions and discussion forums. - Automated alerts sent to registered students for live sessions. Moderated responses approved and published in discussion forums by faculty/mentors. e. Examiner Responsibilities: - Staff members handling the examiner process trained to create assessment schemes, upload question banks, and conduct continuous assessments in the LMS. - Evaluation of subjective assignments and publishing results in the LMS grade book. Overall, staff members acquire necessary skills through practice on the LMS to effectively manage various aspects of online program delivery and assessment.

Briefly write on ICT facilities available/ to be ready dedicated for the implementation of Online Courses :-

We have the following ICT facilities ready: Website for Online Programs: Integrated with web applications, payment gateways, LMS system, and chat facility for prospective students. We have trained resources for managing all mail and call services. Online Registration Application: Our platform handles the entire online registration process, including learner authentication via Aadhar, web application submission, document uploading, online payments, and program application. Software for E-content Creation: We have all necessary software for creating and digitizing content ready. Recording Studio: Equipped with necessary tools for recording videos/essential for tutorial development and conducting live synchronous sessions. Learning Management System (LMS): Our LMS, aligned with UGC guidelines following the four-quadrant approach, enables delivery of online programs. It includes features such as synchronous live sessions, discussion forums, messaging, learner authentication, assessments, and comprehensive reporting and analytics. Ticketing System: Implemented for student support. ERP System: Employed to manage the complete student life cycle. Cloud-Based Servers: We utilize AWS cloud-based servers for efficient and scalable operations.
